

Galeries Lafayette, Marseille

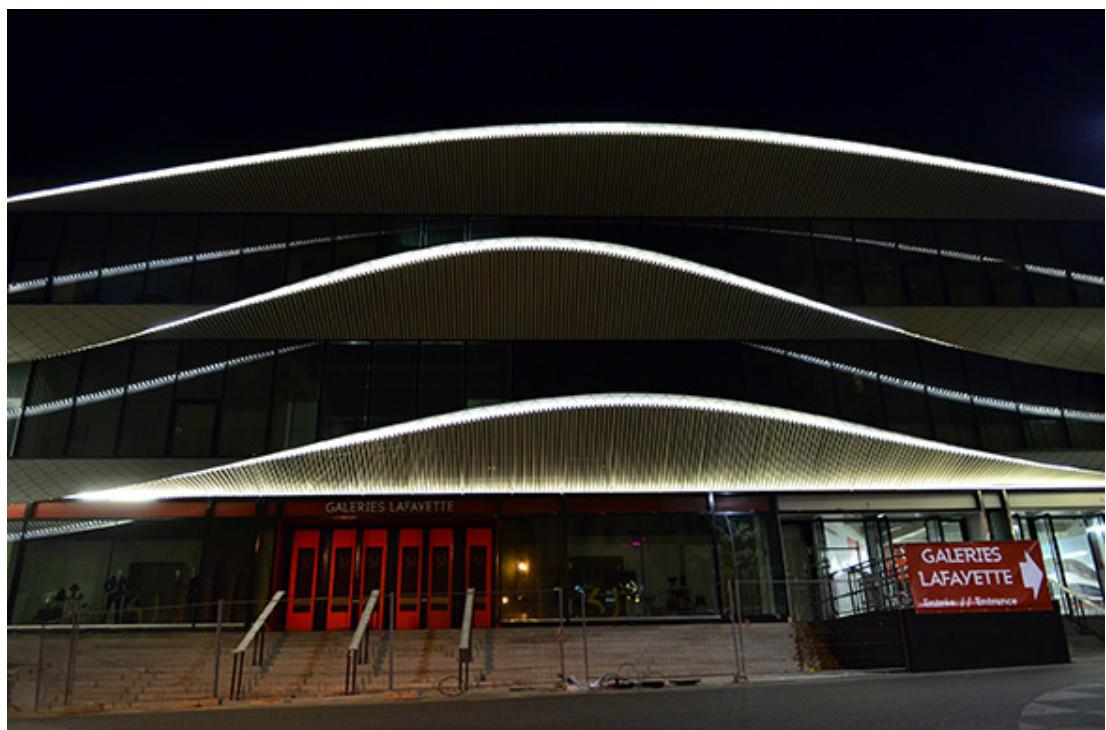

The new facade of the Galeries Lafayette in Marseille, designed by Moatti and Rivière architects, is an architectural achievement, wrapping the Galeries Lafayette of a spectacular glazed and chrystral clear ribbon.

Waving around the facade of the shopping mall, such as a symbolic wave from the Mediterranean Sea, 3 hat veils integrate the architectural exterior lighting devices, designed by the agency 8'18".

LEC manufactured 149 bespoke linears with the 5650-Clem. They are fixed on the internal base of the lower hat veil.

One of the 4 prizes in "Versailles Shopping Mall Architecture 2015 Prize" was accredited to the Galeries Lafayette Mall in the Centre Bourse quarter in Marseille for the architectural quality of the project.

Client: Galeries Lafayette
Architects: Moatti and Rivière
Lighting designers: 8'18"
Installer: Fauché Aix-en-Provence
