Hradec Kralové, Czech Republic

For the Hradec Kralové bus terminal the designers used a wide range of LEC's product range with, for each case, the most appropriate materials to achieve the desired effect.
The 4020-Luminy 2 spotlights illuminate the metal structure whilst the 5725-Alfort marker-lights lit up the structures' feet. The round flush-embedded 2855-Meteor marker-lights light-up the roundabouts. The square flush-embedded 2852-Pyramide marker-lights use different colours to mark-up the pedestrian walkways.
