

St. Brides passageway in London (UK)

To up-light St Brides in the Ludgate area in London, LEC used:

16x [1750AD-Bourgogne](#) BE-PH5 peripheral, recessed screwed marker-lights with 1 Superwatt 1W in warm white, and with a 5mm dome. Thanks to its peripheral lens, this [1750-Bourgogne](#) of very small dimensions produces a major light mark.
