

Place Saint-Pierre Saumur (France)

To liven up the Place Saint Pierre in Saumur in Maine et Loire (France), LEC has developed a mini projector, equipped with a half ball of sanded PMMA, creating a suspension reminiscent of the spirit of the guinguette at the request of the lighting designers ON agency.

4 lines of 11 suspended luminaires were installed between 4 masts. Each ball (Ø68mm) equipped with 4 RGBW power diodes is independently controlled with a 24VDC power supply and integrated DMX. These luminaires are IP68 waterproof.

Installer : CITEOS

Designer and photo credit : agency ON

Luminaires spéciaux type guinguette - 4 lignes de 11 luminaires suspendus, en aluminium anodisé et boule sablée contenant chacune 4 led de puissance RGBW IP68
