

Rue de la République in Lyon

To light up 25 facades of Lyon's main street (Rue de la République), the City of Lyon chose an LED lighting solution using the thin and extra flat 4660-Corsica projectors that fit perfectly within the architectural environment.

Contracting Authority: City of Lyon
Lighting designer: Atelier Roland Jéol
Installer: Bouygues E&S - TPR
Photos: Xavier Chabert / LEC

The République street along with its [fountain](#) are both equipped with high power LEDs.

87 Corsica-4660 LED projectors in warm white 3000K with a special mix of optics light up 25 front-buildings of the République street. Their facades are as high as 19 meters.

All projectors are installed every 7 to 8 meters from one another.
