

Mauer alte synagoge in Offenbach am Main

Built in 1707, the wall of the city's synagogue was recently uplit. The inside of the building has now been turned into a shop but the outside has remained the same.

The city Offenbach am Main, located next to Franckfurt, wanted to illuminate the former windows of the synagogue.

All 6 windows are uplit with a LEC 5760-CE28-L4 Passy recessed linear each in-ground embedded up against the wall.

Specifier: City of Offenbach am main
