

# 40 years of LED expertise

Landowski Fountains in Paris

LEC is a family business founded in 1977 and has a unique history centred on passionate, experienced people working in the sector of exterior lighting and marker lighting.

Having been immediately convinced of the potential of LED technology, we were the first company to integrate it more than 40 years ago into products installed in public spaces.

Driven by the desire to incorporate this technology into our lights and develop its potential, we chose to manage every aspect of the production chain, from the initial design through to final manufacturing.

As a meticulous manufacturer, the main values of our company continually fuel our vision on a daily basis.

- **QUALITY:** cutting-edge skills developed over the past 4 decades: a complete understanding and control of production carried out in the Auvergne-Rhône-Alpes region of France
- **RESPONSIVENESS:** thanks to our availability and our desire to drive forward different projects as well as the genuine close connections that we forge every day with all of our customers, suppliers, partners, etc
- **CONSTANT INNOVATION:** through our integrated engineering design office

Pyramidenkogel Tower in Austria

Ostend in Belgium

Lighted path leading to the Taj Mahal

Madlatua Bridge in Norway

Santarem in Portugal

In the past 40 years, LEC has participated in numerous major exterior and marker lighting projects around the world.

We use our experience both in France and abroad to offer a response that matches the demands of the project specifiers both in France and abroad.

Our expertise and know-how has been applied to light up and enhance a large number of prestigious sites: the Cour d'Honneur in the Palais Royal in Paris, the gates of the Château of Versailles, the MuCEM museum in Marseilles, the Château d'Azay le Rideau, the lighted path leading to the Taj Mahal and many more.

Customise

### CLEAR AND READABLE SIGNAGE

By facilitating night time  
access with markings and  
identifying lights and signs.

### SECURE YOUR DOCKS, YOUR STAIRCASES, YOUR FOOTBRIDGES...

With different types of  
modular lighting solutions.

### CUSTOMISE YOUR ENVIRONMENT

With our custom solutions, lens options,  
casings, paint, etc.  
We can adapt our lights  
to your project.

### ENHANCE

By creating a tailor-made  
lighting atmosphere  
customised and adapted with  
13 different lens options.

A port, garden, historic path, public square or even a  
zoo... all of these places need to be welcoming, secure  
and enjoyable.

LEC offers products that combine all of the qualities  
that can address every one of these needs. That is  
why you can rest assured that your lighting choices will  
create unforgettable memories for all whose evenings  
are lit up by our solutions.
